Experience

UX/UI Designer · mServices · Warsaw

Oct 2023 – present

Designing for a major Polish bank across consumer mobile, B2B enterprise, and public web. Three flagship projects:

- **Mobile payment flow.** Sole designer on the redesigned national payment form in the bank's mobile app. Established the recipient-picker pattern and form scaffold that became the foundation for SEPA, SORBNET, and SWIFT payment flows that followed.
- **Corporate CRM.** Lead designer on module-by-module delivery of a consolidated CRM for corporate banking relationship managers. Built a custom design system synthesising Material Angular, the bank's component specs, and PrimeNG. Ongoing release cadence with continuous user testing.
- **Green Transformation leasing site.** Lead UX/UI designer on a public-facing site for the bank's leasing arm, helping Polish companies navigate green-energy products and ESG obligations. Path-based architecture, partner integrations, live in production.

Previously joined mServices via a three-month internship (Jul – Sep 2023).
